FOREWORD

The purpose of this manual is to describe the Health, Safety, Environment (HSE) & Food Hygiene Management System of Pakistan International Airlines and to provide policy guidelines on all activities related to this system. This Manual outlines the fundamental building blocks of PIACL Corporate Safety / HSE Policy and the commitment to demonstrate PIA's ability to operate in a safe and environmental friendly manner while complying with all applicable regulatory requirements.

Safe and healthy working is the top priority at PIACL, which has been certified with renowned International standards OHSAS-18001 since 2010-2020, further onward ISO 45001 from 2020 and thus demonstrably meets the internationally acknowledged requirements. Health protection – at PIACL means not only conforming to the minimum standards but instead going well beyond them. All working procedures and individual activities which occur within the Company are systematically analyzed for their potential hazards. The results are incorporated; inter alia into organization preventative programs and training courses. We put our trust in numerous safety programs and initiatives, in order to promote safety awareness and to minimize hazards. PIACL perceives physical and social well-being as a holistic task. Prevention programs serve to prevent occupational illnesses and to promote general health care and the avoidance of infectious diseases.

This document comprises of two sections. Section-1 is the Corporate HSE manual which covers HSE Management System Elements, Health, Safety, and Environment Policy, organizational structure, Occupational Health and Safety (OHS), and Environmental Management System (EMS) Standards requirements. Furthermore, Section-2 provides detailed system procedures (SPI's) of the mandatory HSE requirements.

The HSE Manual describes as to how PIACL establishes documents, audits implementations, monitoring of inspections and its reviews to continue improvement for Health, Safety and Environment management system, whereas matters related to Operational Safety, Flight Operations Hazards and Risk Assessments and their controls, Flight Data Monitoring, Crew Resource Management, and Aircraft Accident and Incident Reporting and Investigation are described in Safety Management System (SMS) Manual of Corporate Safety and Corporate QA Division.

The HSE Manual is also intended to present HSE Management System to all interested parties and to present to these parties the specific controls, which are implemented to assure conformance to our stated HSE Policy and commitment to continual improvement in the HSE Management System.

	CORPORATE HSE MANUAL	Page 11 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

This HSE Manual further presents the statement of Pakistan International Airlines that its documented system conforms to the requirements of ISO 45001-Occupational Health and Safety Management System Standard, and ISO 14001-Environmental Management System Standard.

SCOPE:

This document specifies PIACL requirements for an occupational health and safety (OH&S) management system, and gives guidance for its use to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving PIACL OH&S.

This document helps PIACL to achieve the intended outcomes of its OH&S management system, consistent with the organization's OH&S policy, the intended outcomes of PIACL OH&S management system include:

- a) Continual improvement of OH&S performance;
- b) Fulfillment of legal framework and other requirements;
- c) Achievement of OH&S objectives.

This document is an exhibit of PIACL commitment to establish, implement and maintain OH&S management system to improve occupational health and safety, eliminate hazards and minimize OH&S risks (including system deficiencies), take advantage of OH&S opportunities, and address OH&S management system non-conformities associated with its activities.

Note: This document does not address issues such as product safety, property damage or environmental impacts beyond the risks to workers and other relevant interested parties.

	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

REFERENCE STANDARDS

HSE management system of PIACL is based upon the requirements of ISO 45001 and ISO 14001.

GENERAL REQUIREMENTS

The Corporation (PIA) has designed, established, and maintained HSE Management System covering all mandatory requirements of ISO 45001 and ISO 14001.

HSE Management Representative (MR) shall be responsible for ensuring incorporation of requisite changes arising from time to time.

Having studied the OHS hazards and EMS aspects across the network, the Corporate Safety / HSE Policy has been formulated as per the standards' requirements and Corporate HSE objectives have been defined accordingly. To ensure compliances of the HSE Management system in accordance with ISO 45001 and ISO 14001 requirements, and to achieve maximum Occupational safety and environmental protection in the most economical and efficient manner, technology, human as well as material resources shall be utilized. Also, maintenance and continual improvement of the HSE management system shall be pursued by performing Plan Do Check Act (**PDCA**) cycle.

DEFINITIONS OF TERM

Accident

Undesired event giving rise to death, ill, injury, damage or other loss.

Risk:

Combination of the likelihood of an occurrence of a hazardous event or exposure (s) and the severity of injury or ill health that can be caused by the event or exposure(s)

Risk assessment

Process of evaluating the risk(s) arising from a hazard(s), taking into account the adequacy of any existing controls, and deciding whether or not the risk(s) is acceptable

	CORPORATE HSE MANUAL	Page 13 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Acceptable Risk

The risk is acceptable if the probability of an incident occurring and the severity of harm that might results are low, as determined by using a risk assessment matrix.

Audit

Systematic examination to determine whether activities and related results conform to planned arrangements and whether these arrangements are implemented effectively and are suitable for achieving the organization's Policy and objectives.

Auditor

Person with the competence to conduct an audit.

Continual Improvement:

The process of enhancing the OHSMS to achieve ongoing improvement in overall health & safety performance in line with the organization's OHSMS and this manual.

Corrective action

Action to eliminate the cause of a detected non-conformity.

Document

Information and its supporting medium, which can be paper, magnetic, electronic or web based.

Environment

Surroundings in which an organization operates, including air, water, land, natural resources, flora, fauna, humans, and their interrelations.

Environmental Aspect

Element of an organization's activities or products or services that can interact with the environment.

 PAKISTAN International Airlines <i>Great People to Fly With</i>	CORPORATE HSE MANUAL	Page 14 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Environmental Impact

Any change to the environment weather adverse or beneficial, completely or partially resulting from organizations environmental aspects.

Hazard

Source of situation with a potential for harm in terms of injury or ill health, damage to the workplace environment, or a combination of these.

Hazard Identification

Process of recognizing that a hazard exists and defining its characteristics.

HSE Management System

Part of the overall management system that facilitates the management of the HSE risks associated with the business of the organization. This includes the organizational structure, planning activities, responsibilities, practices, procedures, process and resources for developing, implementing, achieving, reviewing and maintaining the organization's Corporate Safety / HSE Policy.

Compliance:

Meeting the requirements of local, provincial or federal statuses, standards or regulations.

Conformance:

Meeting the requirements of the organization's OHSMS and the standards set forth in this manual.

HSE Objectives

Goals, in terms of HSE performance, that an organization sets itself to achieve.

Ill Health

Identifiable, adverse physical or mental condition arising from and/or made worse by a work activity and/or work-related situation.

	CORPORATE HSE MANUAL	Page 15 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Incident

Work related event (s) in which an injury or ill Health (regardless of severity) or fatality occurred, or could have occurred.

Interested Parties

Individuals or group concerned with or affected by HSE performance of an organization.

Internal audit

Systematic, independent and documented process for obtaining audit evidence and evaluating it objectively to determine the extent to which the HSE management system audit criteria set by the organization. (In many cases, particularly in smaller organizations, independence can be demonstrated by the freedom from responsibility for the activity being audited.)

Near-miss

An undesired event that had the potential to become an incident or an accident. An event where, given a slight shift in time or distance, injury, ill-health or damage easily could have occurred, but did not happen this time.

Non-conformances

Any deviation from work standards, practices, procedures, regulations, management system performance etc. that could either directly or indirectly lead to injury, illness, property damage, damage to the workplace environment, or a combination of these.

Occupational Health and Safety

Conditions and factors that affect the well-being of employees, temporary workers, contractors, personnel, visitors and any other person in the workplace.

Performance

Measurable results of the HSE Management System, related to the organization's control of Health, Safety and Environment risks, based on its Corporate Safety Policy and objectives.

	CORPORATE HSE MANUAL	Page 16 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Preventive action

Action to eliminate the cause of a potential nonconformity.

Procedure

A specified way to carry out an activity or a result-oriented process.

Record

Document stating results achieved or providing evidence of activities performed.

Risk

Combination of the likelihood and consequences of a specified hazardous event occurring.

Safety

Freedom from unacceptable risk or harm.

Work Place

Any physical location in which work related activities are performed under the control of the organization.

Normative Reference

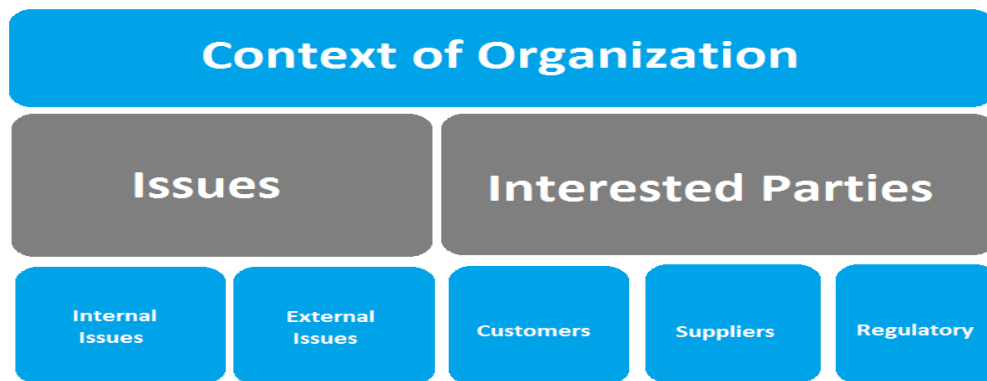

The following International Standards and applicable regulations have been used as reference documents for the development of PIACLHSE Management system.

Occupational Health and Safety System ISO 45001 and ISO 14001

4. CONTEXT OF THE ORGANIZATION

PIACL has established the context of the Organization based on the entire environment in which it operates. The Context can be external or internal. Management tools including SWOT Analysis and PESTLE Analysis (Political, Economic, Social, Technological, Legal and Environmental factors) have been utilized in determining the context.

4.1 Understanding the organization and its context

PIACL has determined the internal and external issues which have the potential to affect the outcome of its Occupational Health & Safety (OH&S) Management System. The internal or external issues can be positive or negative in nature. They can include conditions, characteristics or changing circumstances which can affect the OH&S management system.

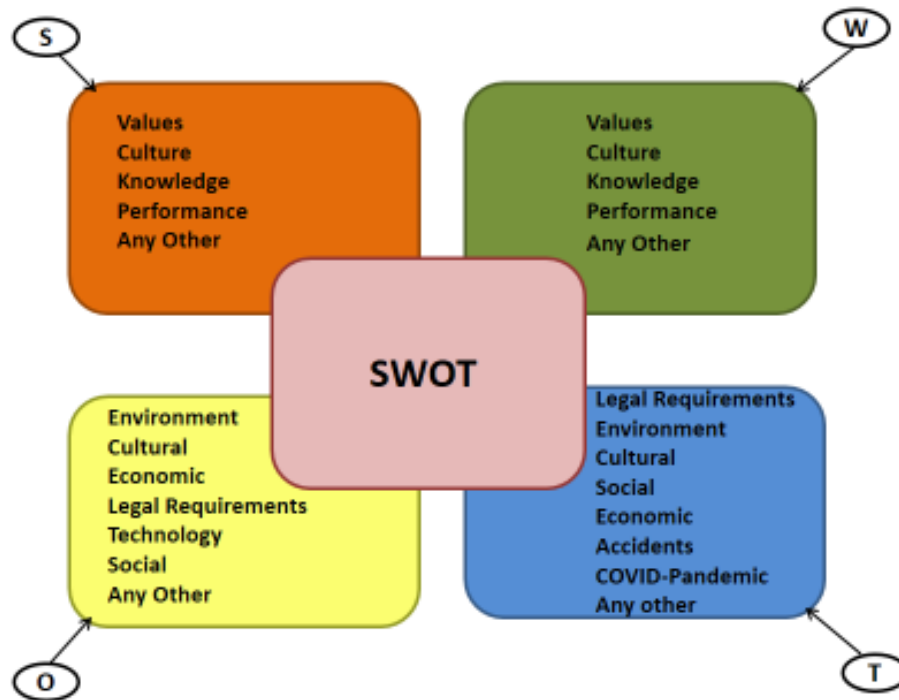

External issues can be:

- PESTLE (Political, Economic, Social, Technological, Legal and Environmental) etc. factors.
- New competitors, contractors, suppliers, partners etc.
- Latest knowledge about products and their ability to affect OH&S.
- Key drivers and trends relevant to airline industry.
- Relationships with external interested parties.
- Legal requirement of state & regulatory body regarding OH&S.
- Changes in any of the above factors.

	CORPORATE HSE MANUAL	Page 18 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Internal issues can be:

- PIACL organizational structural changes.
- Policies and objectives of the roles.
- Capabilities in terms of Resources such as capital, human and technological.
- Information systems.
- Relationship as well as perception of workers.
- Contractual relationships such as outsourced activities.
- Working conditions and organizational safety culture.
- Working time arrangements.
- Change in product, process or equipment.
- Change in factors which may introduce HSE hazards or negatively affect the effectiveness of existing system controls.

	CORPORATE HSE MANUAL	Page 19 of 48
		Ed-4 (Rev # 00) May 2022

4.2 Understanding the needs and expectations of workers and other interested parties

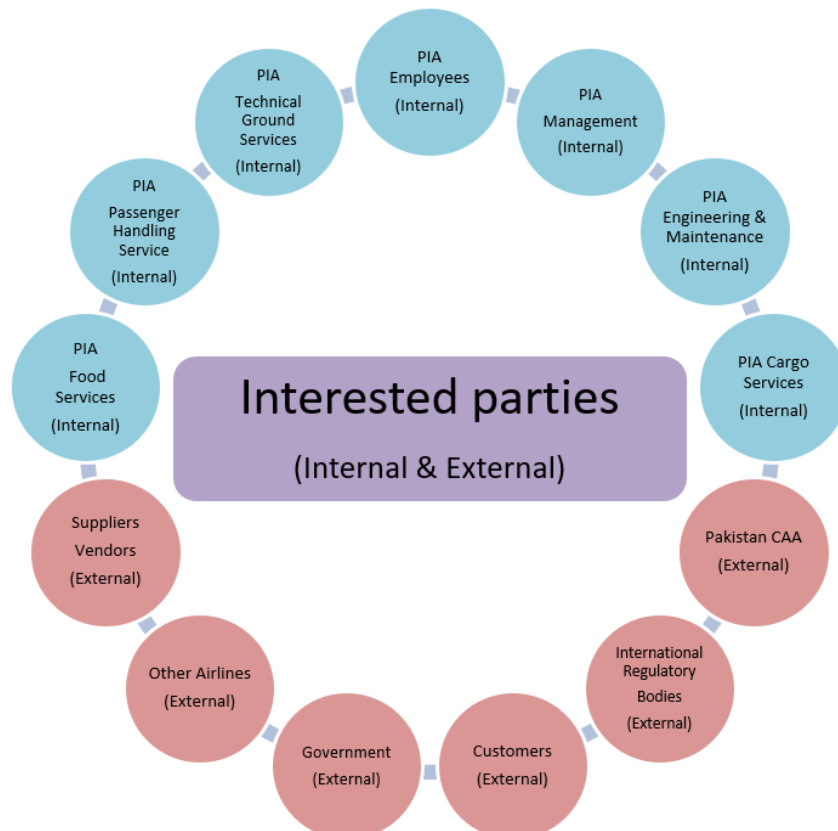

PIACL has documented 'Interested parties' which includes all the 'Stakeholders' and the process has defined all stakeholders' involvement in addition to the PIACL employees or workers.

The interested parties' classification in addition to workers is based on the notion that all stakeholders who may influence PIACL OH&S positively or negatively. The needs and expectations of identified parties are addressed keeping in view the legal requirements and other operational requirements.

While considering interested parties, some needs and expectations are mandatory and incorporated into law and regulatory requirements of Pakistan Civil Aviation Authority therefore all such requirements are mandatory to consider. The potential effects of these parties on PIACL OH&S are documented as well, keeping in view all regulatory requirements.

Supporting Documents;

HSE System Procedure for Need & Expectation of interested parties (HSE-SP-6)

 PAKISTAN International Airlines <i>Great People to Fly With</i>	CORPORATE HSE MANUAL	Page 20 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

4.3 Scope of the OH&S Management System

The scope of the PIACL OH&S management system encompasses the flight & ground operations, 'Engineering and Maintenance' activities and food services at following stations;

1. Karachi
2. Lahore
3. Islamabad
4. Peshawar

The scope has been determined keeping in view the requirements of interested parties, internal and external issues, and the planned or performed work related activities.

The following is the list of OH&S work related activities; the same are monitored and audited regularly based on pre-established SOPs and parameters.

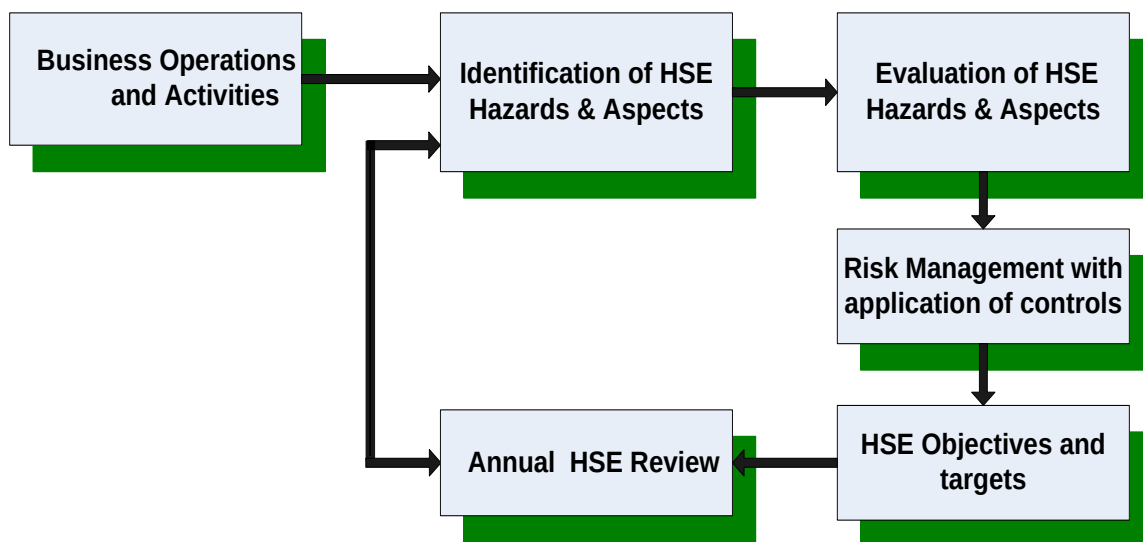

- Hazard identification and risk assessment
- Accident / Incident mechanism
- Food and Kitchen hygiene
- Health and Hygiene
- Monitoring and quality evaluation of drinking water & portable water
- Calibration of all measuring and monitoring devices
- Permit to Work (PTW)
- General Waste Management
- HSE parameters related to PIACL vendors and suppliers
- Disposal of Bio Medical waste

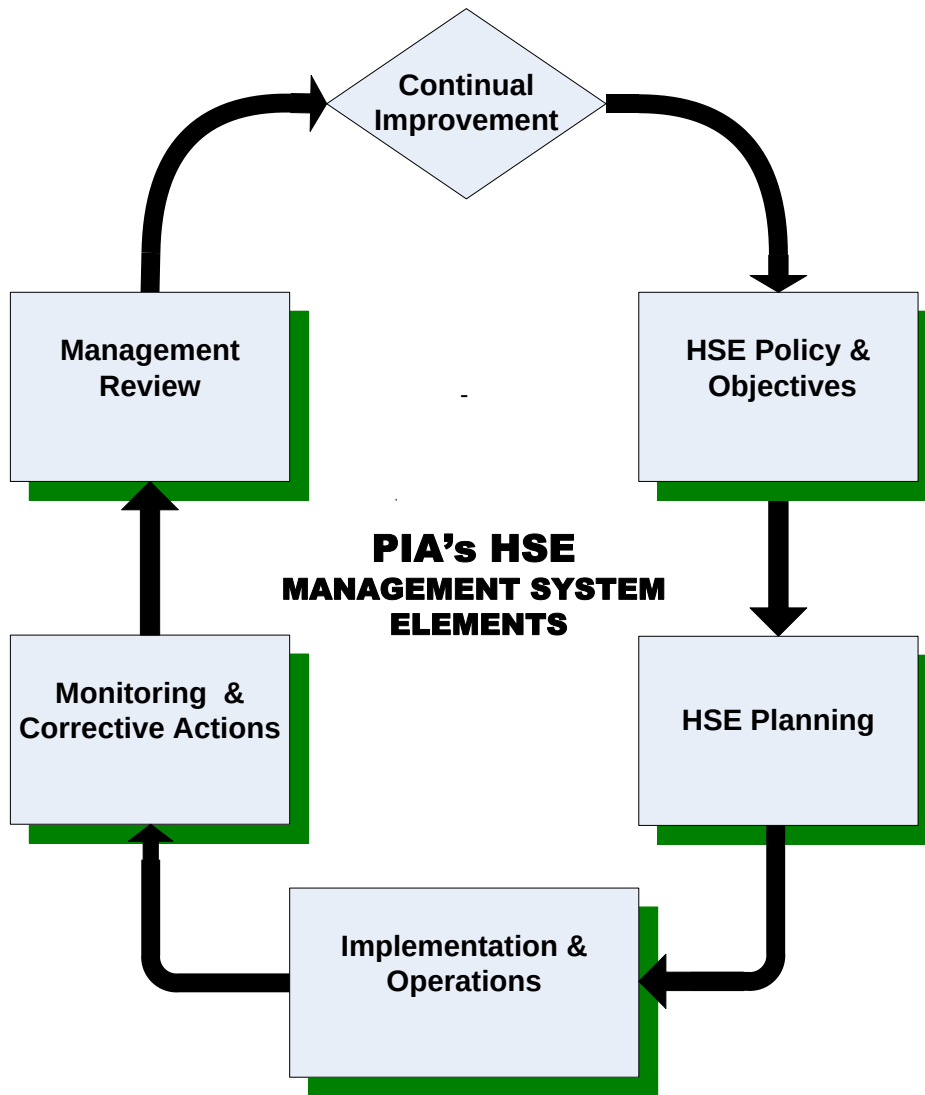

PIACL OH&S management system has included all the activities, products and services within the Organization's control or influence that can impact the organization's OH&S performance.

5. LEADERSHIP AND WORKER PARTICIPATION

5.1 LEADERSHIP AND COMMITMENT

The Top management of Corporate Safety Department / Division is fully committed to implement an effective OH & S Management System at Corporate level and it is demonstrated by their leadership and commitment through following;

- a) Top Management has established and defined roles and responsibilities for every employee working in Corporate Safety Department in Corporate Job Description Manual available on PIACL intranet and communicated to all employee. Every individual is responsible to ensure effective implementation of OH&S Management System in their respective areas as they are accountable to senior management for the performance of their respective job assignments.
- b) Top Management of Corporate Safety Department / Division ensures that Corporate Safety & HSE Policy and its objectives are established and are compatible with the context and strategic direction of the organization.
- c) Top management ensures that OH&S requirements are integrated with other processes of the organization.
- d) Risk based thinking and decision-making approach is encouraged by top management of Corporate Safety Department / Division.
- e) All necessary resources needed for effective implementation of OH&S management system and effective functioning of Departmental functions are provided by top management.
- f) Top management Communicates the importance of effective OH&S management and of conforming to the OH&S management system requirements thorough,
 - Regular SMS Dashboard Review
 - Regular Management Review Meetings
 - Internal Correspondence, e.g., Circulars, Bulletins, e-mails, etc.
 - OH & S Management System Documentation e.g., SOPs, Training, etc
- g) Top management ensures OHSMS to achieve its intended results through effective monitoring
- h) All employees working in Corporate Safety Department / Division are encouraged and supported by top management to contribute to effective implementation OH & SMS.
- i) Top management encourages and promotes the improvement initiatives at all levels.

	CORPORATE HSE MANUAL	Page 24 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

- j) Top management supports other relevant management roles to demonstrate their leadership as it applies to their areas of responsibility.

5.2 Corporate Safety / HSE Policy

PIACL has established its Corporate Safety / HSE policy in compliance with mandatory requirements of ISO 45001 and ISO 14001 and to ensure fulfilment of regulatory requirements.

The HSE policy shall be communicated to all the employees of PIACL in order to promote their understanding of the policy, enhance their awareness to the OHS and EMS, and promote Occupational Safety and Environmental protection as a company-wide activity. The Corporate Management shall establish and review the Corporate Safety / HSE policy at time of “Management Review”.

Corporate Safety /HSE Policy clearly depicts that it is;

- Appropriate to the nature, scale and HSE hazards and impacts of Aviation Industry’s Area of activities.
- Commitment to comply with relevant HSE legislation, regulations and other requirements.
- The complete frame work for establishing and reviewing the HSE Objectives on periodic basis, as needed.
- Documented, well communicated, understood and implemented across the board.
- The commitment of corporate management to at least comply with current applicable HSE requirements and legislation.
- Available for all stakeholders and interested parties.

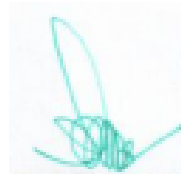

Communication of the Corporate Safety / HSE policy to all stakeholders shall be achieved through all available means of communication.

SAFETY POLICY

I, as Chief Executive Officer PIAL in this corporate policy present manifestation of the management is commitment towards operational safety, occupational health and safety (OH & S), security, environment and quality management at PIAL. Accordingly, I have mandated the management of PIAL to ensure that due priority is accorded to all these focus areas, while managing day-to-day operations:

- We shall ensure that the organizational lines of responsibility & accountability for implementation of this corporate policy cascades through all levels of the management, starting from the undersigned, heads of departments, functional managers, front line operational employees, to employees having limited scope of work. On my directions, this policy also extends to all external service providers and handling agents. I and the entire PIAL management commits that all-out effort shall be made to ensure awareness, understanding, implementation and promotion of this corporate policy.
- We reckon that continual improvement in the level of operational safety performance, proactive management of safety risks, adoption of best industry practice, training program and innovation of strategies for inculcation, promotion and maintenance of a positive safety culture are the basic enabling tools for a robust Safety Management System, OH & S, Security, environmental management & Quality assurance framework.
- We shall ensure that regular review is carried out by the undersigned of risk-based performance indicators, analysis of undesirable operational results and strict follow-up of corrective, as well as, preventive actions focused on addressing the root cause(s). We shall focus on continual improvement of systems, policies and procedures. I shall mandate my teams that all internal changes and external changes having an impact on PIAL operations shall also be managed proactively to ensure a smooth transition with controlled risk. I extend this assurance that no employee shall face any punitive action for reporting direct or indirect hazards to aircraft operations or workplace safety.
- We will ensure that every employee is responsible for immediately reporting safety or security hazards, human errors and safety concern/issue to the concerned managers or Corporate Safety through company reporting procedures, and good timely reports shall be rewarded and a non-punitive reporting policy shall be practiced. At PIAL I shall ensure that safety data, safety information and safety reporters are protected. As compliance to standards, regulations and company policies are mandatory requirements, I shall not tolerate or deliberate breach of policy and procedures, if proven, and strict disciplinary action shall be taken as per 'Just Safety Culture' policy, after investigations by qualified technical experts.
- As the Accountable Executive, I commit myself through employees' participation for ensuring the overall performance, proper implementation & maintenance of PIAL & Engineering & Maintenance's Safety, OH & S, Security, environmental & Quality Management Systems as per organizational requirements. I shall be responsible for providing and allocating necessary financial, infrastructure & competent human resources, as well as, workspace equipment & facilities, support services to ensure overall safety, security and delivery of quality services for best customer experience. Concurrently, all operational plans shall be prepared in compliance to this corporate policy.

I am obligated to ensure that safety, security & compliance risks to aircraft operations, workplace conditions, in particular and to organization in general shall be minimized by adhering to the conditions and restrictions of Air Operator Certificate (AOC), statutory, regulatory requirements, subscribed international standards and to company's own standards; this includes ensuring adherence to all applicable operational, statutory & regulatory requirements where PIAL operations are conducted. I shall make all out endeavour that all personnel of PIAL adhere to the above without any prejudice, delay or interference in such matters. I have mandated Corporate Safety to ensure unbiased actions and shall remain available to facilitate the organization as a whole.

	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

5.3 Organizational Roles, Responsibilities and Authorities

The Management has assigned responsibilities and authorities for all relevant roles in the company. These are communicated through the combination of the organizational Chart, job description and responsibility and authority matrixes specific and relevant to OHS Management system.

PIACL Management is committed to provide leadership and assume overall responsibility for implementing, maintaining and monitoring performance of the PIACL OHSMS including:

- a. Providing appropriate financial, human and organizational resources to plan, implement, operate, check, correct and review the OH & SMS.
- b. Defining roles, assigning responsibilities, establishing accountability and delegating authority to implement an effective OH & SMS for continual improvement.
- c. Integrating the OHSMS into the organization's other business systems, processes and assuring the organization's performance review, compensation, and reward and recognition systems are aligned with the OHS policy and the OHSMS performance objectives.

Management shall ensure that OHS is a prime responsibility to all and it is accepted at all levels.

Employees shall assume responsibility for aspects of OHS, over which they have control, including adherence to the organization's health and safety rules and requirements.

	CORPORATE HSE MANUAL	Page 28 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Responsibilities of HSE Management Representative

The specific duties of the HSE management representative are as follows:

- To establish, implement, maintain and control the HSE Management System, which complies with ISO 45001 and ISO 14001 requirements.
- Follow-up of objectives and targets.
- Conduct the Periodical HSE management review meetings.
- Co-ordinate for establishment of management program to achieve objectives and targets.
- Report Corporate Management on performance of HSE Management System.
- Identification of legal, regulatory and other requirements.
- Monitoring of internal communication.
- Scheduling & Monitoring internal audits & appoint auditors.
- To control documentation of HSE Management System.

Corporate HSE Committee

The Corporate HSE Committee shall be consisting of the following members;

- a. The airline's Accountable Executives
- b. All Chiefs /Heads
- c. GM Safety / Head of Safety
- d. Management Representatives

The Corporate HSE Committee shall be responsible to perform the following functions;

- Defining HSE Policy.
- Defining HSE Objectives for continual improvement.
- Assuming responsibility for HSE in PIA.
- Appointing an HSE Management Representative.
- Creating HSE Organizational structure at Departmental and Divisional Level.
- Periodic performance review of HSE Management system for continuing suitability and effectiveness.
- Providing resources and decisions for continual improvement.

The Corporate HSE Committee conducts annual meeting especially for the management review of the HSE Management System.

	CORPORATE HSE MANUAL	Page 29 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Departmental/Divisional HSE Working Committees

Each Department has one HSE Working Committee ([HSE-SP-01](#)) that consists of:

- Departmental Head Head
- All Divisional HeadsMembers
- HSE Co-ordinator.....Co-ordinating Member

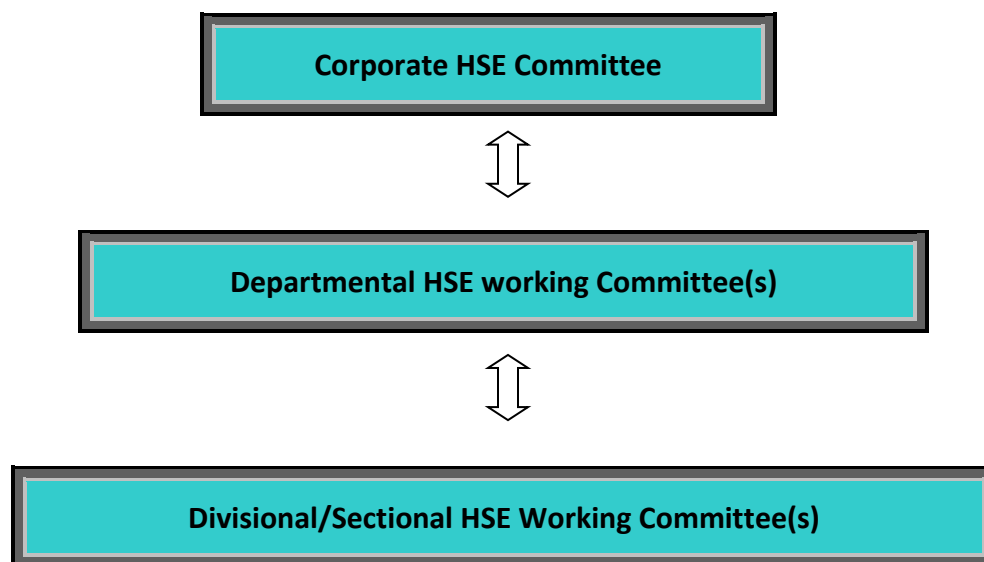

Departmental / Divisional / Sectional HSE Working Committees

Working committees will Report to HSE Working Committee Head

Working Committees consist of;

- Divisional / Sectional Head.....Head
- 3-8 persons from the same Division, (preferably representing different work activities)... Members
- HSE Co-ordinator..... Co-ordinating Member

Responsibilities of Departmental/Divisional/Sectional heads

The roles, responsibilities and authorities of personnel having an effect on the HSE management system are defined and documented in the Corporate Job Description Manual which is maintained by the HR Department.

	CORPORATE HSE MANUAL	Page 30 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

5.4 Consultation and Participation of Workers

PIACL has established a process to ensure effective participation in the OHSMS by its employees at all levels of the organization, including those working closest to the hazards by:

1. Providing opportunities to all the employees to be part of the risk assessment & hazard identification & its controls in the context of tool box talk / recurrent training & group discussion with the following process:
 - a. Planning
 - b. Implementation
 - c. Evaluation, corrective action and preventative action
 - d. To facilitate employees anonymous hazard reporting
2. Providing employees and employee representatives with timely access to information relevant to the OHSMS; and
3. Identifying and removing obstacles or barriers to participation.

	CORPORATE HSE MANUAL	Page 31 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

6. PLANNING

PIACL is committed to identifying and addressing relevant OH&S risks and opportunities as a means for:

- Increasing the effectiveness of the OHS Management system.
- Improving performance.
- Preventing or mitigating negative effects.

When undertaking risk management activities, the following factors are considered:

- Positive and negative factors or conditions.
- External context and issues, such as legal, regulatory, technological, competitive, cultural, social, political and economic environments.
- Internal context and issues, such as values, culture, organization structure, knowledge and performance of the business.
- Determination of the requirements and needs and expectations of interested parties relevant to PIACL OHS.
- Authority and ability to exercise control and influence.
- Activities, products and services relevant to the business.

The company may adopt any or a combination of the following risk options:

- Avoid the risk.
- Eliminate the risk source.
- Take the risk to pursue an opportunity.
- Change the likelihood or consequences of the risk.
- Share the risk.
- Retain the risk by informed decision.

Opportunities identified by the company may lead to:

- Adoption of new and improved processes.
- Launching new products or services.
- Pursuing new markets.
- Utilizing new technology.
- Improved ways of addressing customer needs.

	CORPORATE HSE MANUAL	Page 32 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

The company will manage risk and opportunities as follows:

- a. Through ongoing effective leadership and commitment to the OHS management system.
- b. OH&S Hazard Identification & Risk Assessment mechanism through all activities.
- c. Manage risks and opportunities in the SAG meetings and the Management meetings.
- d. Through the effective management and control of suppliers and contractors.
- e. Through the effective training of personnel to ensure they are competent to perform relevant tasks safely.
- f. By monitoring, measurement and review of relevant processes and outputs.

6.1 Hazard Identification and Assessment of Risks and Opportunities

The purpose of this procedure is to effectively and systematically identify, document review and control actual and potential hazards.

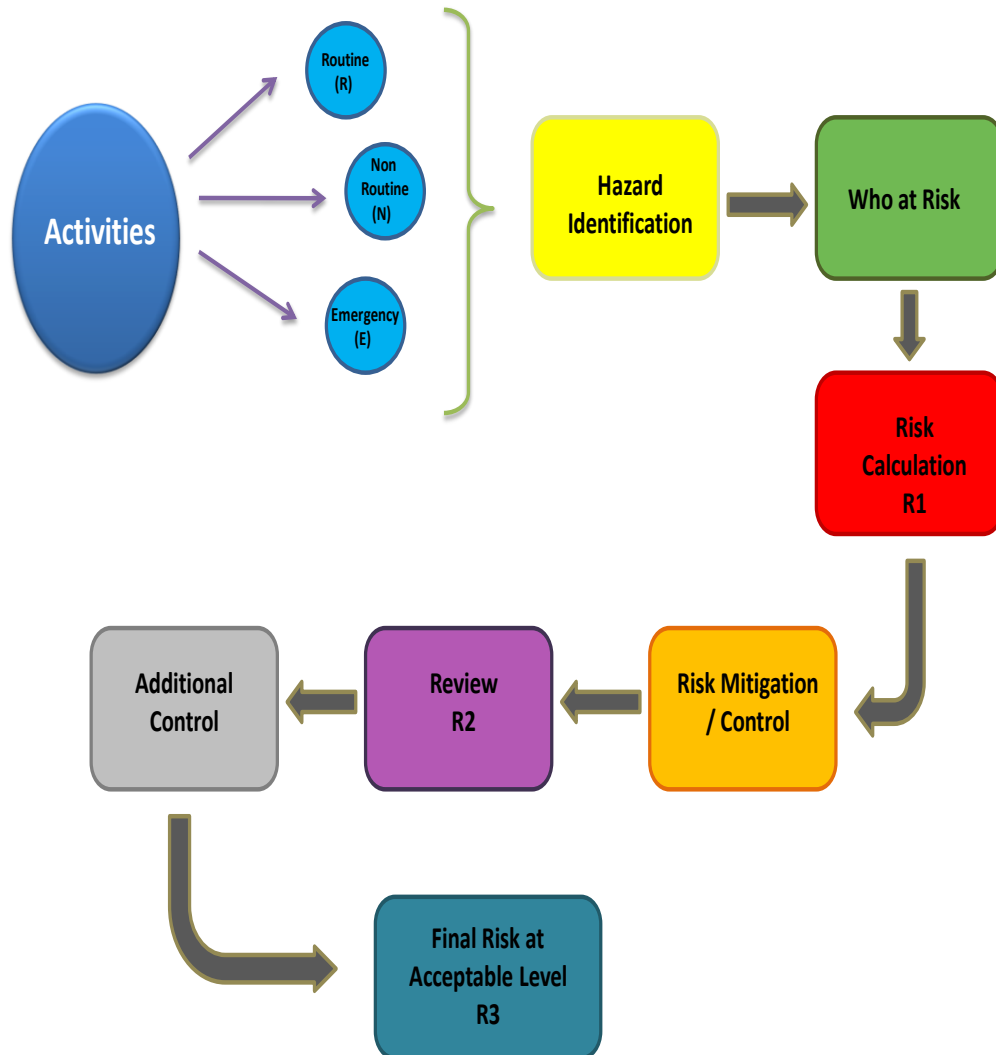

Associated Documents: HSE Risk Assessment Procedure (HSE-SP-02)

Procedure

1. Hazard Identification - On identification of a new hazard it will be entered into the Risk register along with the potential harm that the hazard is likely to cause.
2. Risk Analysis - The module will step you through the process of assessing and developing appropriate controls based on significance.
3. Once the hazard has been entered and controls set the new risk assessment will be carried out.
4. Once the risk register is updated, it needs to be circulated to the concerned areas and must be maintained.
5. Register Review – PIACL HSE section regularly reviews the updated risk register and validates the risk assessment and required control(s). HSE reviews any changes that have a bearing on the health and safety of employees to ensure that procedures can be updated or arranged training.

HAZARD IDENTIFICATION & RISK ASSESSMENT PROCESS

	CORPORATE HSE MANUAL	Page 34 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Hazard Identification

Hazards may be identified by the following methods

- Employees may report hazard through PK-SMS application.
- PIACL Safe card reporting / Confidential Reporting Form
- Initial and routine inspections of the workplace.
- Hazard is drawn to the attention of the Safety representative, Supervisor or Manager.
- Accident and incident or critical event identifies a new hazard.
- New equipment and tasks will be subject to a hazard review before use

Hazard Assessment

1. Hazards will be assessed for significance/ risk.
2. Risk assessment matrix and risk scores will be recorded for all new hazards reported and will also be recorded in Risk registers.

Documentation and Registers

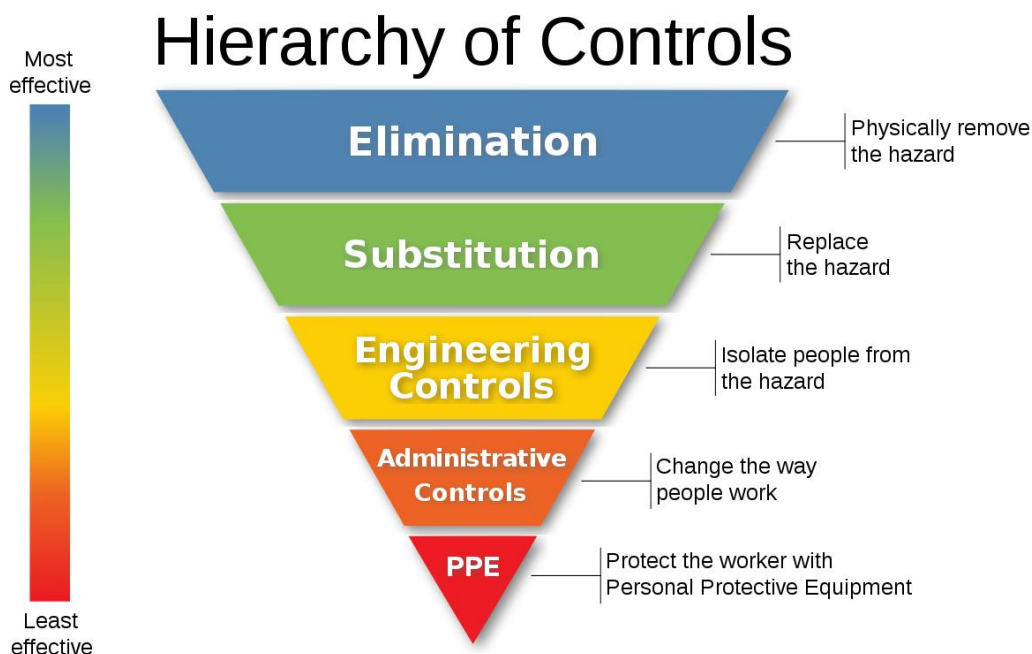

1. Hazards that are significant are documented in the company hazard register.
2. Task analysis (TA), Job safety analysis (JSA), Safe Work Statement Methods (SWMS) or Site-Specific Safety Plans (SSSP) may also be used to identify hazards and document the associated controls.

Application of Controls

Hazards that are significant will be controlled by applying all reasonably practicable steps. Controls will be applied in the following orders:

1. Elimination
2. Substitution
3. Engineering controls
4. Administrative controls
5. Personal Protective Equipment (PPE)

	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

6.1.1 Legal and Other Requirements

PIACL ensures that it has identified, complies with and verifies compliance with all of the relevant legislative, regulatory and other requirements that are applicable to its hazards, OH&S risks and OH&S management system.

Procedure

Legislative and other requirements may include, but are not limited to:

- PIACL Corporate requirements
- PCAA Regulation
- Aviation Industry standards or codes
- IATA Acts and Regulations (including ILO)
- HSE Standards
- Voluntary commitments
- Government Regulations

Details of all relevant legislative and other requirements are to be contained within the compliance module. These will include mitigations and control methods. The Management Legal Team are to ensure that where possible, they are notified of changes and/or additions to legal and other requirements as those changes occur.

The means of ensuring notification of changes and/or additions may include agreements with external legal or consulting organizations to monitor and advise of any changes.

	CORPORATE HSE MANUAL	Page 36 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

6.2 PIACL OH&S Objectives and Planning to achieve them

The Corporate Safety Department/ Division has established HSE objectives at appropriate functions and at all levels within the organization. These objectives are defined in measurable terms and are the interpretation of goals and HSE policy deployment in each department of organization.

These objectives are established and maintained at department level and are consistent with the Organization Vision, Mission, Safety & HSE Policy, commitment to continual improvement and meeting requirements of services.

Department HSE coordinators forwards the draft objectives for review to Corporate Safety – HSE, after review objectives are subsequently approved by Concerned Area Head/ Chief.

Procedure:

PIACL on the annual basis establishes measurable objectives and targets in relation to its HSE performance. The established objectives and targets must be:

- Consistent with the applicable policies.
- Measurable & time bound
- Monitored and updated.
- Effectively communicated to relevant parties.

When establishing, reviewing and updating measurable objectives and targets, consideration is to be given to:

- Health and safety hazards/risks.
- Significant environmental aspects and risks/opportunities.
- Significant business or quality risks/opportunities.
- Technological, financial, operational and business requirements.
- Products and services provided to customers.
- The enhancement of customer satisfaction.
- Views of stakeholders.
- Legal and other requirements.

Once measurable objectives and targets have been established, plans for achieving those measurable objectives and targets are to be established.

Performance in achieving each measurable objective and target is to be periodically monitored during Management Review Meetings.

7. SUPPORT

7.1 Training, Awareness and Competence

PIACL shall identify necessary education and training for its employees, and promote the enhancement of understanding and awareness of HSE Management System.

PIACL has formulated a comprehensive System Procedure (HSE-SP-04) which defines mechanism and responsibilities for ensuring that personnel are competent, know HSE hazards, associated risks and controls. And they can perform their job safely. The procedure defines mechanisms for identifying HSE training needs, competency criteria, training plans and training assessments.

This Procedure comprises of;

- Competency Criteria.
- Training Need Assessment.
- Training Plans and their executions.
- Possible Training Topics.
- Contractors' trainings.
- Measurement of post training effectiveness.

Supporting Documents;

HSE System Procedure for HSE Trainings (HSE-SP-04)

7.2 Communication Participation and Consultation

PIACL has established a System Procedure for Consultation and Communication (HSE-SP-03). The purpose of this procedure is to define mechanism and responsibilities for internal communication within PIACL and to receive, consider and respond to appropriate communication with external interested parties related to PIA's Health, Safety and Environment Management System.

Associated Document: HSE System Procedure for HSE Consultation and Communication (HSE-SP-03)

 PAKISTAN International Airlines Great People to Fly With	CORPORATE HSE MANUAL	Page 38 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

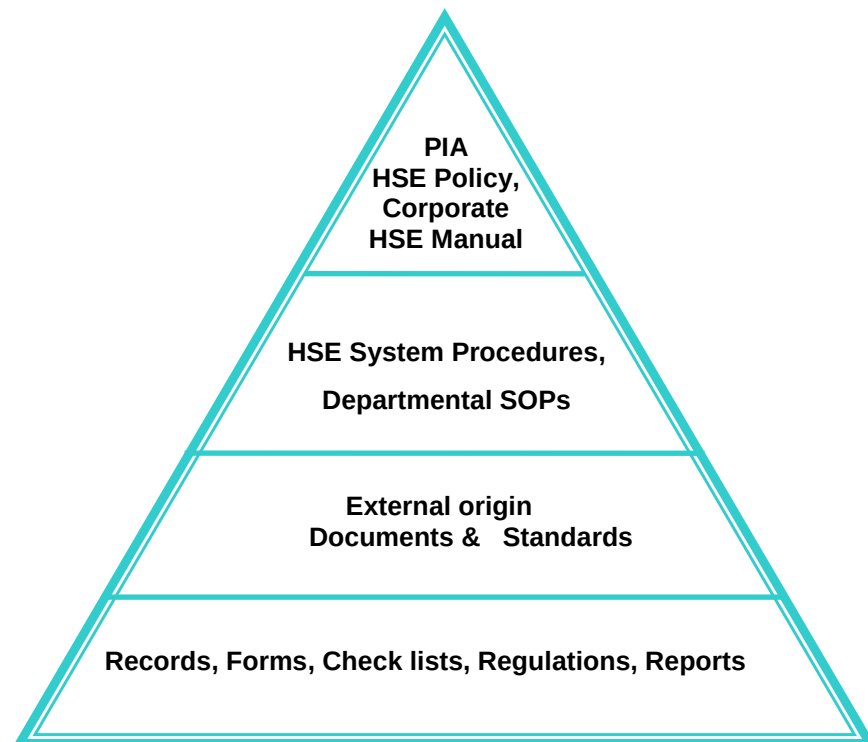

7.3 Document and Record Control

PIACL has established a System Procedure for control of documents and records (HSE-SP-05). The purpose of this procedure is to define mechanism and responsibilities for control of documents and records. The procedure defines controls for all documents and records used in HSE system.

Core elements of the System Procedure are;

- Identification of the Documents.
- Legibility and retrieval of the Documents.
- Indexing of the Documents.
- Availability of the Documents.
- Creation and Modification of the Documents.
- Retrieval and retention of the Obsolete Documents.
- Record control.
- Disposition of records.

HSE DOCUMENTS HIERARCHY

	CORPORATE HSE MANUAL	Page 39 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Issuance and Control of HSE Manual

The Corporate HSE Manual is approved by the airline's Accountable Executive. It is a controlled document. HSE Management Representative (MR) is authorized to issue the manual and to ensure that all controlled copies of the documents are kept up to date.

Changes in the manual shall be incorporated by replacing the obsolete sections/pages. Accordingly, revision numbers shall be allocated. After 10 (ten) such revisions (relating to sections), the entire manual shall be re-issued with a new edition number. Once the complete manual is revised all sections shall once again begin from revision 0. It is the responsibility of MR to retain one copy of obsolete manual as historical record.

This document is not to be duplicated. Any-one desirous of having a copy must contact MR. Only controlled copies are distributed to departments/personnel within PIA. If required for information purposes, only uncontrolled copies may be issued to organization outside PIACL. Uncontrolled copies shall be identified as '**UNCONTROLLED DOCUMENT**' on the first page, and shall not be subsequently updated.

This manual can be revised any time if need arises; however, a planned review shall be carried out once every three years.

Compliance with the requirements of the manual and its reference documents is mandatory for everyone within the scope of the HSE Management System of PIA.

8. OPERATION

8.1.1 Hazard Identification & Risk Assessment

PIACL has established a System Procedure (HSE-SP-02) for risk management through identification of Hazards and then application of operational controls. The purpose of this procedure is to define mechanism and responsibilities to identify Occupational Health and Safety (OHS) Hazards and assess their Risks. It also aims to provide mechanism and responsibilities to identify Environmental Aspects and assess Environmental Impacts.

The scope of the System Procedure covers all Routine, Non-Routine, and Emergency activities of all personnel associated with PIA's Operational Activities, Facilities, Aircraft workplaces, equipment's (PIACL owned and Contractors').

System Procedure also covers the application of Operational Controls and additional Controls (if requires) on risks associated on identified HSE Hazards on regular basis.

Supporting Documents;

HSE System Procedure for OHS Hazard-Risk Management (HSE-SP-02).

8.1.2 Management of Change (MOC)

To define responsibility and mechanism for the management of change, so that HSE risks and hazards are addressed, when making new infrastructure or making changes in existing infrastructure, or identifying operational risks when plant and equipment operates in the complete range of its intended design. A proactive hazard identification for safety assurance can be carried out by managing the change (MoC).

A change brought in the system or its components may introduce new hazards or altogether reduce the effectiveness of the existing safety controls in the system. To avoid any uncontrolled hazards and to strengthen the existing controls (if required) it is necessary that a proactive measure shall be taken to avoid surprises.

Supporting Documents;

HSE System Procedure for Management of Change (HSE-SP-17).

	CORPORATE HSE MANUAL	Page 41 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

8.1.3 Procurement

Identifying HSE issues and requirements for products and services purchased, and then considering these requirements for:

- Communication to suppliers/ contractors.
- Selection & evaluation of suppliers and contractors.
- Selection and purchase of products and services.
- Implementation of these requirements while contractors and suppliers work in PIACL premises.

Scope

This procedure is applicable to all PIACL activities related to:

- All contractors and suppliers
- All products and services
- All contractor/supplier activities at PIACL premises/jurisdiction

Assessment, Evaluation and Performance Monitoring of Suppliers / Contractors

Supply Chain Department (or any other department) undertaking any purchasing must evaluate suppliers/contractors on the basis and extent to which they meet HSE and environmental standards set by PIA.

The Supply Chain Department shall ensure that the Supplier/Contractor has the ability and willingness to comply with HSE criteria (HSE-F-9A) and must obtain Supplier/Contractor agreement signature.

The selection criteria of Suppliers/Contractors shall take into consideration their previous safety record (HSE-F-9B).

Suppliers/Contractors shall meet all statutory and regulatory requirements with respect to health safety and environment.

PIA's Responsibilities for Ensuring that Contractors/Suppliers Implement HSE Requirements

It is the responsibility of the concerned department to provide complete HSE information to the supplier/contractor.

	CORPORATE HSE MANUAL	Page 42 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Supplier/Contractor's Responsibility

Before starting the project, the Supplier/Contractor will have a meeting with the nominated representative of the concerned Department. The representative will identify all applicable HSE requirements.

The Supplier/Contractor ensures that he understands and implements these requirements.

These could include but not limited to PPEs, authorized entrances, identification badges, no smoking requirements, orderly conduct, no use of drugs/liquors/weapons/cameras/ mobile phones.

8.2 Emergency Preparedness and Response

PIACL has established a dedicated Section "Emergency Response Planning" (ERP) to provide 24-hours emergency coverage for workplace & aircraft related incident/accident.

Corporate ERP Manual is placed on PIACL website for easy access. The Manual comprises of Standard Operating Procedures for all emergency situations.

ERP Section of Corporate Safety has its own ERP centre which is equipped with state-of-the-art technological equipment's and communication centre. A dedicated Emergency Help line (45678) & Fire Emergency (4555) have been established on which any one can call from anywhere across the network for emergency, need and help of;

- Ambulance
- Fire services
- Security

	CORPORATE HSE MANUAL	Page 43 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

9. PERFORMANCE EVALUATION

9.1 Monitoring, Measurement, Analysis & Measurement Evaluation

It is the mechanism for monitoring and measuring of Standard Evaluation Parameters (SEPs) of HSE system, to determine compliance with policies, procedures and laws and to find opportunities for continual improvement.

Scope

This procedure covers all Standard Evaluation Parameters (SEPs) of HSE system.

Responsibility

- Head of Corporate Safety or his appointed nominee has the overall responsibility to ensure that measurement and monitoring is carried out and the results are analyzed.
- Chief's/Divisional Heads have the responsibility to ensure that they carry out measurement and monitoring of HSE relevant to their Department/Division.
- All measurement and monitoring Data collected by the Departments/Divisions are sent to DGM (HSE) where the Data is analyzed.
- The analyzed Data is presented to Top Management in the Management Review meeting along with recommendations for continual improvement.
- Head of Corporate Safety will define the responsibilities & duties for periodic HSE System SEPs in consultation with the concerned Departmental/ Divisional Heads.

OHS and EMS Performance

HSE-F-10A lists all OHS whereas HSE-F-10B lists all EMS parameters that must be measured on proactive and reactive basis. Both the forms also list the frequency of measurement.

DGM (HSE) receives all measurement results (from those responsible to measure them), carries out analysis of the data and trends and presents summary to top management during management reviews.

HSE objectives achievement

Head of Corporate Safety will ensure that HSE objectives and targets are regularly measured and the measurement results are presented to Top Management in each management review meeting.

Supporting Documents;

HSE System Procedure for Measurement & Monitoring (HSE-SP-10).

	CORPORATE HSE MANUAL	Page 44 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

9.2 HSE Internal Audits

In order to ensure that the HSE activities are appropriate and carried out in order to achieve the HSE objectives, targets and with the compliance of the ISO 45001 standards that the activities are indeed carried out in accordance with the HSE management System, periodic internal audits are planned and carried out under the responsibility and authority of the HSE management representative.

PIACL has established a System Procedure for HSE Internal Audits (HSE-SP-11), the purpose of this procedure is to define mechanism and responsibilities for:

- Planning, conducting Health Safety and Environment (HSE) System Internal Audits and reporting the results.
- To fulfil documentary reporting of Non-conformances (if any), reviewing root cause and corrective action and performing follow-up.

This procedure comprises HSE System Audits which are to be performed in all departments and processes within the HSE Management System of PIACL including Subcontractors and Suppliers (**where required**).

Supporting Documents;

HSE System Procedure for HSE Internal audits (HSE-SP-11)

	CORPORATE HSE MANUAL	Page 45 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

9.3 Management Review

PIACL Corporate Management is fully committed to have continuous focus over its day to day and long-term strategies.

To ensure continuing suitability, adequacy and effectiveness, management reviews will be conducted as part of Management Review Committee (MRC) once in a year headed by accountable executive. Corporate Quality Assurance (CQA) section is responsible to plan Management Review Meeting.

Agenda of the HSE Management Review meeting (Review Inputs)

Areas to be addressed will include the following;

- a) Follow up actions from previous management review.
- b) Review of findings and follow-up of the corrective and preventive actions.
- c) Results and reports of the internal audits.
- d) Effectiveness of stated HSE policy.
- e) Setting and updating the HSE objectives, targets and management programs.
- f) Current levels (testing results) and control of OHS Hazards and EMS aspects, hazards and risk (Impact of out of control parameters).
- g) Data relating to accidents and incidents that have occurred and the state of preparedness for emergency.
- h) Views of interested parties.

Output (s) of the HSE Management Review Meetings

The outputs from management review shall be;

- a) HSE Management System performance.
- b) Corporate Safety / HSE policy and objectives.
- c) Resource provisioning.
- d) Continual improvement in HSE system

The outputs of the management review shall be communicated to all relevant levels through established means of communication within PIA.

	CORPORATE HSE MANUAL	Page 46 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

10. IMPROVEMENT

Corporate Safety Department / Division determines and selects opportunities for improvement and implements any necessary actions to meet HSE standard requirements and to enhance employee's satisfaction.

The following points are included:

- Improve occupational health of employees to meet requirements and address future needs and expectations.
- Correcting and improving or reducing undesired effects
- Improving the performance and effectiveness of the OH & S Management System and its processes.

10.1 Incident, Non-conformity and Corrective Action

Management review ensures ascertaining the responsibility and mechanism for handling, preventing and investigating HSE violations/non-conformances.

In addition to this, Chapter 12 of Corporate Quality Manual will also be used for guidance and reference.

Scope

This procedure is applicable to all departments, sections and functional areas of PIA.

Responsibilities

HSE Section / Departmental coordinators are the initiators of the Corrective Action Requests (CARs). They shall coordinate, register and follow-up the CARs. Process Owners are responsible to investigate root-causes and propose actual corrective actions. Non-conformances may also be identified by employees through HSE Safe Cards / Confidential Reporting Form or Electronics SMS Reporting.

HSE Violations/Non-conformances

HSE non-conformance could be any of the following:

- **Non-conformances related to HSE Complaints from External Interested Parties**
- **Non-conformances related to Monitoring and measurement of HSE results**

Violation of NEQS, any OHS law, non-compliance of any HSE system related requirement (such as not holding safety meeting), non-compliance of HSE instructions

	CORPORATE HSE MANUAL	Page 47 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

(such as PTW not issued), not enforcing a defined control (such as not wearing a PPE), or any other non-compliance of HSE system. All these are recorded on HSE-F-9A.

Procedure for Investigation & Corrective Actions of HSE Violation/Non-conformance

- Unless a specific investigation team has been appointed, the concerned Department/division investigates all non-conformances (HSE-F-11A).
- Department/Division takes immediate actions to mitigate the harm, deficiency or damage, based on the immediate needs of the situation.
- Investigation is carried out and Root cause is determined.
- Actions are taken to eliminate / mitigate the root cause to avoid recurrence.
- DGM (HSE) reviews HSE-F-11A for effectiveness of actions taken and closes out the report.
- In case of any lack of action, MR shall intervene to get an NCR raised, and corrective actions taken.

Follow-up and Verification

- When a corrective action is decided upon, it is implemented on trial basis and the Departmental HSE Coordinators closely monitor the results.
- Verification of Corrective Action is the responsibility of the process owners, their Incharges, departmental HSE Coordinators and/or the HSE Section to ensure that the respective corrective action is implemented correctly, standardized, and recurrence avoided.
- Implementation of the corrective action should be completed in given timeframe.
- Corrective actions relating to regulatory violations and high-risk safety issues shall be initiated immediately upon identification of the violation/issue.

10.2 Continuous Improvement

Continuous improvement is a necessary requirement to manage changing variables with time and hence it is important to first evaluate the current state of the organization for suitability, adequacy and effectiveness. The evaluation is carried out by performance monitoring and measurement through following means:

- HSE Audits
- Hazard Reporting (Reactive, Proactive & Predictive)
- Food Inspection
- Safety & HSE Review
- Accident & Incident Reporting
- Water Quality Monitoring

	CORPORATE HSE MANUAL	Page 48 of 48
	Document # HSE / M / 01	Ed-4 (Rev # 00) May 2022

Safety performance monitoring and regular review is carried out by relevant Safety Action Groups (SAGs), Management Review Committee (Ref Corporate QA Manual, Chapter 5, and Admin order # 04/2013). Management Review Committee (MRC) is the highest forum which may have embedded functions of Safety Review Board (SRB) for monitoring and assessing the OH & S Management System and program's performance at least once in a year. In MRC senior management of the airline reviews to ensure the appropriate allocation of resources, result of internal audits, safety & HSE recommendations and investigation outcomes to ensure proper functioning of airlines operations, as well as capability to respond to external audits such as OHSAS 18001 / ISO 45001 and ISO 14001 etc.
